RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.  
MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

**Environmental Interest/Information System:**

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-EPSC (Maryland - Environmental Permit Service Center) promotes multi-media pollution prevention and provides permit assistance to business and industries. An online permit guide is available and lists all permits, licenses and approvals that are issued by MDE.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

MD-EPSC (Maryland - Environmental Permit Service Center) promotes multi-media pollution prevention and provides permit assistance to business and industries. An online permit guide is available and lists all permits, licenses and approvals that are issued by MDE. US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**AIR MINOR**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and at Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

## Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).  
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

**Environmental Interest/Information System:**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-EPSC (Maryland - Environmental Permit Service Center) promotes multi-media pollution prevention and provides permit assistance to business and industries. An online permit guide is available and lists all permits, licenses and approvals that are issued by MDE.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System:

MD-EPSC (Maryland - Environmental Permit Service Center) promotes multi-media pollution prevention and provides permit assistance to business and industries. An online permit guide is available and lists all permits, licenses and approvals that are issued by MDE. US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

**Environmental Interest/Information System:**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.  
MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

**ARE 5 RESEARCH PLACE LLC (Continued)**

**1000523777**

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

**AIR SYNTHETIC MINOR**

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

**GROSVENOR PLACE, 10401 (Continued)**

**1016098756**

MD-EPSC (Maryland - Environmental Permit Service Center) promotes multi-media pollution prevention and provides permit assistance to business and industries. An online permit guide is available and lists all permits, licenses and approvals that are issued by MDE. US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Aerometric Data (SAROAD). AIFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

**Environmental Interest/Information System:**

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA). RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

**Environmental Interest/Information System:**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

|               |   |
|---------------|---|
| . Waste code: | P005  |
| . Waste name: | 2-PROPEN-1-OL (OR) ALLYL ALCOHOL  |
| . Waste code: | P041  |
| . Waste name: | DIETHYL-P-NITROPHENYL PHOSPHATE (OR) PHOSPHORIC ACID, DIETHYL 4-NITROPHENYL ESTER   |
| . Waste code: | P058  |
| . Waste name: | ACETIC ACID, FLUORO-, SODIUM SALT (OR) FLUOROACETIC ACID, SODIUM SALT   |
| . Waste code: | P105  |
| . Waste name: | SODIUM AZIDE  |
| . Waste code: | U002  |
| . Waste name: | 2-PROPANONE (I) (OR) ACETONE (I)  |
| . Waste code: | U003  |
| . Waste name: | ACETONITRILE (I,T)  |
| . Waste code: | U007  |
| . Waste name: | 2-PROPENAMIDE (OR) ACRYLAMIDE   |
| . Waste code: | U010  |
| . Waste name: | AZIRINO [2',3':3,4]PYRROLO[1,2-A]INDOLE-4,7-DIONE, 6-AMINO-8-[[[(AMINOCARBONYL)OXY]METHYL]-1,1A,2,8,8A,8B-HEXAHYDRO-8A-MET HOXY-5-METHYL-, [1AS-(1AALPHA, 8BETA, 8AALPHA, 8BALPHA)]- (OR) MITOMYCIN C |
| . Waste code: | U031  |
| . Waste name: | 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)  |
| . Waste code: | U044  |
| . Waste name: | CHLOROFORM (OR) METHANE, TRICHLORO-   |
| . Waste code: | U108  |
| . Waste name: | 1,4-DIETHYLENEOXIDE (OR) 1,4-DIOXANE  |
| . Waste code: | U112  |
| . Waste name: | ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)   |
| . Waste code: | U117  |
| . Waste name: | ETHANE, 1,1'-OXYBIS-(I) (OR) ETHYL ETHER (I)  |
| . Waste code: | U122  |

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

Name: THE PROMENADE- UNIT #1728 SOUTH  
Address: 5225 POOKS HILL ROAD  
City,State,Zip: BETHESDA, MD 20814-  
Year: 2016  
Removal/Encapsulation/Demolition Start Date: 10/08/2016  
Removal/Encapsulation/Demolition End Date: 10/08/2016  
Days of the week worked: SAT  
Volume off facility Component (Cat I) not removed: 0 Cubic Yards  
Volume off facility Component (Cat I) not removed: 0 Cubic Yards  
Volume off facility Component (Cat II) not removed: 0 Cubic Yards  
Hours worked in a day: 0800-160  
Original or resubmit: O Origina  
Number of floors in building: 18  
Pipe Cat I not removed: 0 Linear Feet  
Pipe Cat II not removed: 0 Linear Feet  
Type of Building: Residence  
Contractor name: America Environmental  
Length of project: Not reported  
Type of project from notification form: S-N Non-NESHAP Renovation/Dem  
Volume off facility component Cat I non friable removed: 0 Cubic Yards  
Pipes Cat I non friable removed: 0 Linear Feet  
Surface area Cat I non friable removed: 0 Square Feet  
Volume off facility component, Cat II non friable removed: 0 Cubic Yards  
Pipe Cat II non friable removed: 0 Linear Feet  
Surface area Cat II non friable removed: 0 Square Feet  
Volume of facility component RACM removed: 0 Cubic Yards  
Pipes RACM removed: 0 Linear Feet  
Surface area RACM removed: 120 Square Feet  
Surface area Cat I not removed: 0 Square Feet  
Surface area Cat II not removed: 0 Square Feet  
Site description (found in Section II of the notification): Not reported  
Owner of the site: TRUE  
Landfill asbestos will be sent to: TRUE  
Transporter of the waste: TRUE  
Facility off components units: Not reported

**Environmental Interest/Information System:**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions

**Environmental Interest/Information System:**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.  
MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

Environmental Interest/Information System:

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Amount (Lbs): 2312.8

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Amount (Lbs): 1184.1

Waste code: D009  
Waste name: MERCURY  
Amount (Lbs): 379

Waste code: D022  
Waste name: CHLOROFORM  
Amount (Lbs): 309.9

Click Here:

**Environmental Interest/Information System:**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

Environmental Interest/Information System:

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.  
MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

**Environmental Interest/Information System:**

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.  
MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

**Environmental Interest/Information System:**

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

business and industries. An online permit guide is available and lists all permits, licenses and approvals that are issued by MDE. US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

**Environmental Interest/Information System:**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

**Environmental Interest/Information System:**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

**AIR MINOR**

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act. MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

Environmental Interest/Information System:

MD-EPSC (Maryland - Environmental Permit Service Center) promotes multi-media pollution prevention and provides permit assistance to business and industries. An online permit guide is available and lists all permits, licenses and approvals that are issued by MDE.  
US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

Handler Activities Summary:

U.S. importer of hazardous waste: No  
Mixed waste (haz. and radioactive): No  
Recycler of hazardous waste: No  
Transporter of hazardous waste: No  
Treater, storer or disposer of HW: No  
Underground injection activity: No  
On-site burner exemption: No  
Furnace exemption: No  
Used oil fuel burner: No  
Used oil processor: No  
User oil refiner: No  
Used oil fuel marketer to burner: No  
Used oil Specification marketer: No  
Used oil transfer facility: No  
Used oil transporter: No

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**SHADY GROVE CLEANERS (Continued)**

**1000193723**

Environmental Interest/Information System:

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

MD-PEMIS (Maryland - Permanent (Air) Emission) database houses data related to Air Emissions. Also known to the EPA as National Emissions Inventory (NEI).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System:**

MD-EPSC (Maryland - Environmental Permit Service Center) promotes multi-media pollution prevention and provides permit assistance to business and industries. An online permit guide is available and lists all permits, licenses and approvals that are issued by MDE. US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MD-RCRA (Maryland - Resource Conservation And Recovery Act Information System) houses state information relating to the Resource Conservation and Recovery Act (RCRA).

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

|   | Data Release Frequency: Quarterly      |

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 10/15/1991

### ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/27/2020

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

### ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

### VCP: Voluntary Cleanup Program Applicants/Participants

The Voluntary Cleanup Program, administrated by the Dept. of the Environment, streamlines the environmental cleanup process for sites, usually industrial or commercial properties, that are contaminated, or perceived to be contaminated, by hazardous substances. Developers and lenders are provided with certain limitations on liability and participants in the program are provided certainty in the process by knowing exactly what will be required.

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### **Local Brownfield lists**

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

#### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

### **Local Lists of Registered Storage Tanks**

#### Historical UST: Historical UST Registered Database

In 1997 the Department of the Environment sent out registration forms to all the owner's listed in the UST database. Once they got the registration forms back they entered the information into a new UST database. we call this database UST. Because not all owners returned their forms, we kept the old UST database and labeled it HIST UST so that we would not be missing any past UST records. This listing is no longer updated or maintained by the agency. It is current through November 1996.

Date of Government Version: 11/21/1996

### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Next Scheduled EDR Contact: 08/17/2020  
Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

### RMP: Risk Management Plans

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006  
Date Data Arrived at EDR: 03/01/2007  
Date Made Active in Reports: 04/10/2007

Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 08/30/2019

Data Release Frequency: No Update Planned

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

##### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A  
Date Data Arrived at EDR: N/A  
Date Made Active in Reports: N/A  
Number of Days to Update: N/A

Source: EDR, Inc.

Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

##### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A

##### EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### **OTHER DATABASE(S)**

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

##### **CT MANIFEST: Hazardous Waste Manifest Data**

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Child Care Providers

Source: Department of Human Resources

Telephone: 410-767-7805

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

## **APPENDIX I – RESUMES OF ENVIRONMENTAL PROFESSIONALS**

## DAVID C. POSTLEWAITE

### Lead Environmental Scientist

#### Years with the firm

1.5

#### Years total

13

#### Areas of practice

*Project management, due-diligence, environmental compliance, RCRA- and CERCLA-driven site investigations, field oversight/subcontractor management, Phase I and Phase II ESAs, ECPs, EBSs NEPA, health & safety, GIS analysis and projects, asbestos/lead-based paint surveys, stormwater management/compliance*

#### Languages

English

#### CAREER SUMMARY

David Postlewaite is a lead environmental scientist with WSP USA with over 12 years of broad environmental compliance and consulting experience in site investigation and document preparation under environmental statutes including the NEPA, CWA, RCRA, CERCLA and TSCA for the Department of Defense (DoD), Department of Homeland Security (DHS), US Environmental Protection Agency (EPA), Department of Transportation (DOT), as well as other federal, state, and private sector clients.

Mr. Postlewaite is proficient in all aspects of project management and has managed multiple federal and private projects for clients across CONUS, as well as in Alaska, Hawaii, Puerto Rico, and the US Virgin Islands.

Mr. Postlewaite is proficient in the understanding and the application of environmental regulations/statutes to address environmental compliance, due-diligence, site remediation and restoration, pollution prevention, resource conservation, worker health & safety, and land development issues. David's extensive experience includes the management and oversight of over 55 RCRA and CERCLA-driven site investigations, as well as over 80 Phase I/II Environmental Site Assessments, Environmental Baseline Surveys, and Environmental Condition of Property Reports, and Corridor Phase I ESAs for both federal and private sector clients. David has comprehensive expertise in GIS software applications, use of remote sensing technologies, and modeling methods to characterize environmental impacts in soil and groundwater.

#### EDUCATION

B.S., Environmental and Natural Resources; concentration in Applied Economics and Policy, Clemson University, Clemson, South Carolina 2006

#### ADDITIONAL TRAINING

|  |      |
|--|------|
| OSHA 8-Hour HAZWOPER Site Supervisor Refresher | 2020 |
| OSHA 8-Hour Refresher HAZWOPER                 | 2020 |
| First Aid/CPR                                  | 2020 |

#### PROFESSIONAL MEMBERSHIPS

Society of American Military Engineers Sustaining Young Member 2007- Present

#### PROFESSIONAL EXPERIENCE

##### Due Diligence

- Maryland I-495 & I-270 P3 Program/Managed Lanes Study (May 2019 – Present). Assistant task manager, currently conducting a corridor-wide Phase I ESA for over 70 miles of interstate in the State of Maryland. The project includes creation of figures in GIS, large scale records searches, information requests from Federal and local agencies, site reconnaissance, and geospatial interpretation. Currently

**DAVID C. POSTLEWAITE**  
*Lead Environmental Scientist*

---

determining what sites within the corridor will we require additional investigations. Client: State of Maryland. Value. \$250,000+

- Balls Ford Interchange Project, Manassas, Virginia (May 2020 – Present). Lead task manager currently overseeing a corridor-wide Phase I ESA on over 215 acres of land part of the construction of a new double diamond diverging interchange to connect Balls Ford Road and Prince William Parkway in Manassas/Bristow, Virginia. The project includes creation of figures in GIS, large scale records searches, information requests from Federal and local agencies, site reconnaissance, and geospatial interpretation. Value. \$30,000
- Freeman Avenue Bridge Project, City of Chesapeake, Virginia (August 2020 – Present). Lead task manager that oversaw and conducted a corridor-wide Phase I ESA on over 175 acres of heavy industrial land part of the construction of a new overpass to elevate traffic around an active railroad crossing in the City of Chesapeake, Virginia. The project includes creation of figures in GIS, large scale records searches, information requests from Federal and local agencies, site reconnaissance, and geospatial interpretation. Value. \$30,000
- Former Adhesive Tape Manufacturing Facility (September 2019) Project Manager that conducted a Phase I environmental site assessment of an approximately 12-acre textile tape manufacturing facility located in Johnson City, Tennessee. The Phase I ESAs included the creation of figures, records searches, information requests from local officials, and geospatial interpretation. Value: Confidential.
- Textile Weaving Facility, North Carolina (August 2019) consultant that conducted a Phase I environmental site assessment of an approximately 5-acre textile weaving facility located in Cliffside, NC. Assessed the impacts of a pre-regulatory dump directly adjacent to the facility. Client: Confidential. Value: Confidential.
- Phase I and Phase II Environmental Site Assessment (ESA) Support, USVI (2018 – 2019): project manager for two Phase I ESA's under ASTM E1527-13 standards for Coca-Cola facilities on USVI St Thomas and St Croix. Planned Phase II soil and groundwater investigations at each facility, as well as lead-based paint and asbestos surveys. Client: The Coca-Cola Company. Value: \$50,000
- U.S. Army Privatization of Army Lodging Initiative Environmental Condition of Property (ECP) Reports, Phase I ESAs, and Phase II ESAs, EAs, Nationwide (2010–2019): project manager/environmental scientist overseeing the drafting of ECP reports and Phase I ESAs for multiple lodging parcels at 40 Army installations in support of the Privatization of Army Lodging (PAL) Initiative. Identified environmental constraints (e.g. storage tanks, installation restoration sites, stormwater impacts, lead, asbestos, and biological/cultural resources) on the proposed lodging parcels. Performed site inspections, records searches, maps and figure creation, geospatial interpretation, and interviews with facility/installation personnel. Oversaw Phase II soil and groundwater investigations at several of the installations that included soil and groundwater sampling, as well as indoor air quality monitoring. Distilled extensive information to compose the HTRW and Geology sections of the EAs. Supervised and mentored a junior staff member on the process of conducting records searches and site visits, as well as the production of NEPA documents. Client: US Army IMCOM, USACE, Mobile District, and Lendlease/Rest Easy, LLC.
- Phase I and Phase II Environmental Site Assessment (ESA) Support, Northern California (2015–2019): project manager that ensured the completion of over 45 Phase I ESA's under ASTM E1527-13 standards for Verizon Wireless in the Northern

**DAVID C. POSTLEWAITE**  
*Lead Environmental Scientist*

---

California region. Accomplished field assessments of proposed cellular sites across Northern California to accurately assess and develop recommendations for each cellular site. Provided oversight of 15 Phase II ESAs related to RECs and BERs identified during the Phase I ESAs. Field activities included soil boring sampling, monitoring well installation, and geophysical surveys. Client: Verizon Wireless, LLC.

- Tenant Inspection Program (TIP), Northern California (2014–2019): lead site inspector that performed inspections in the North California Region for the program, which includes quarterly tenant environmental reviews of approximately 100 million square feet of tenant space in 29 major city regions nationwide. Performed Phase I ESAs of properties that were subsequently added to the program. When requested by the Client, also performed subsurface investigations, industrial hygiene inspections (asbestos, lead-based paint, and/or microbial growth [mold]), emergency responses to releases of hazardous substances, and dry well inspections at properties in the program. Client: Confidential.
- As-Needed Environmental Services, Pier 70 Historic Core Regeneration, San Francisco (2016–2017): project manager/lead site assessor that researched and visually assessed the condition of the structures and land to support Orton’s rehabilitation of Pier 70’s “Historic Core” of six buildings dating back to the 1880’s and encompassing 267,000 square feet, including the massive Union Iron Works Machine Shop and the Bethlehem Steel office building. The property was transferred to Orton from the Port of San Francisco through a long-term 50-year groundlease that required extensive negotiations with the Port in regard to land-use controls and covenants. Client: Orton Development.
- Phase I and Phase II Environmental Site Assessment (ESA) Support, Hawaii (2016 – 2017): project manager in charge of drafting seven Phase I ESA’s under ASTM E1527 – 13 standards for Coca-Cola across the islands of Hawaii, including Kauai, Molokai, Island of Hawaii, and Oahu. Oversaw two Phase II investigations based on findings from the Phase I ESAs. Field activities included soil boring sampling, monitoring well installation/sampling, and indoor air monitoring. Client: The Coca-Cola Company.
- Phase I ESAs for Potential Customs and Border Protection (CBP) Facilities, New York, Vermont, Minnesota, North Dakota (2010–2014): project manager supporting the Department of Homeland Security (DHS) and USACE to identify parcels for new CBP facilities in New York, Vermont, Minnesota, and North Dakota; produced nine Phase I ESAs for potential development properties to construct new CBP facilities on. The Phase I ESAs included the creation of figures, records searches, information requests from local officials, and geospatial interpretation. Drafted the Hazardous and Toxic Waste (HTW) and Geology sections of the environmental assessment (EA) from information gathered during the Phase I ESAs. Client: USACE, Buffalo District/DHS.
- New York State Homes and Community Renewal (HCR) Hurricane Sandy Tier II Checklist Review, New York, (2013–2014): project Scientist responsible for completing over 165 desktop tier II checklist assessments for properties affected by Hurricane Sandy. Completed Tier 2 Reviews on New York State Homes and Community Renewal’s (HCRs) behalf. The checklists were submitted to the HUD for approval of funding for assistance with rehabilitation and other activities. Used prior experience gained from performing Phase I ESAs and GIS projects to identify whether the surrounding environmental would be affected by the rehabilitation

**DAVID C. POSTLEWAITE**  
*Lead Environmental Scientist*

---

and renovation of structures damaged and/or destroyed by Hurricane Sandy. Produced up to 25 maps per residential structure and provided environmental expertise to other staff when they had questions as to whether a property may have been impacted by nearby contaminated sites or documented hazardous spills. Client: US Department of Housing and Urban Development [HUD].

- Phase I and Phase II Harpersfield Dam Feasibility Study, Harpersfield, Ohio (2010 – 2011): assistant project manager that drafted the Phase I ESA, Phase II site investigation, and EA HTW section for a deteriorating low-head dam located on Grand River in northeastern Ohio. The Phase I ESA included site visits, records searches, library research, and interviews with local officials. The Phase II site investigation included sediment sampling behind the dam to determine adverse downstream impacts if the dam was removed. Sampling activities included the use of a petite ponar deployed boat side to collect sediment samples. Used Phase I and II analytical data to draft the HTW and Geology sections of the Harpersfield Dam EA. Client: USACE, Buffalo District.
- Phase II ESA Hatfield Gate Site, Joint Base Myer-Henderson Hall, Virginia (2009): assistant project manager in charge of field oversight during a Phase II ESA on Joint Base Myer-Henderson Hall, Virginia. Investigated a five-acre solid waste sanitary landfill proposed to the site of a new lodging facility part of PAL. Field activities included soil and groundwater investigations, as well as geophysical modeling. In charge of preparing a field investigation plan, investigation specifications, and other environmental documents including a HASP, SAP, and quality assurance project plan (QAPP). Utilized CADD/GIS to interpret and illustrate analytical findings from the sampling investigation. Completed project under an expedited timeline and under budget, which required finite planning and coordination with our numerous subcontractors and local USACE-approved laboratory. Client: Lendlease/Rest Easy, LLC and US Army IMCOM

*Compliance*

- Privatization of Army Lodging (PAL) Comprehensive Environmental Management Plans, Nationwide (2018–2019): project manager tasked with preparing 40 Comprehensive Environmental Management Plans (CEMPs) for the PAL Program. Under the PAL Program, Rest Easy is developing Intercontinental Hotels Group (IHG) hotels on 40 military CONUS/OCONUS installations. The CEMPs address multiple environmental aspects including stormwater, water quality management, asbestos-containing materials, lead-based paint, solid waste, hazardous materials, hazardous & universal wastes, pesticide management, refrigerants, PCB-containing management, mold, radon, pesticide application, pesticide-impacted soils, contaminated soils, storage tanks, munitions and explosives of concern/UXO, as well as cultural and natural resources. The CEMPs include guidelines and references of federal, state, and DoD policies pertaining to the environmental aspects. The CEMPs are intended for reference by site personnel involved with Rest Easy's development-managed work and IHG's operations/asset management. The project required extensive research and consultation with regulators and installation personnel with specialized knowledge in these environmental programs. Client: Lendlease/Rest Easy, LLC and US Army IMCOM.
- On-Call Environmental and Emergency Response Services, United Airlines Maintenance Center, San Francisco International Airport (April 2014 – February 2019). Provided on-call and emergency response services at United Airlines Maintenance Center that comprises 125-acres and 2.9 million square feet of working space. Tasks included project management and oversight of asbestos and

**DAVID C. POSTLEWAITE**  
*Lead Environmental Scientist*

---

lead-based paint remediation abatement, indoor air sampling and other industrial hygiene services. Assisted in drafting air permits for painting facilities and autoclaves, as well as providing spill response. Client: United Airlines

- Privatization of Army Lodging UST/AST Program, Nationwide (2014-2015): assistant project manager tasked with overseeing the removal of underground storage tanks (USTs) and installation of new aboveground storage tanks (ASTs) at four Rest Easy lodging sites across the country. Managed three satellite offices performing construction oversight, subcontractor management, H&S training/compliance, regulatory compliance, and working with DPW personnel at each installation to make sure that all submittals and projects tasks are approved before construction activities are performed. Trained personnel in Lendlease's construction H&S program, permitting, and Global Minimum Global Requirement (GMRs) standard operating procedures. Client: Lendlease/Rest Easy, LLC.
- Special Appropriations Act Project Evaluation and Reporting, Nationwide (2014): field auditor that performed site inspections, procurement and financial management review of sealed bid, competitive proposal, design/build, and small purchase procurements; federal grant inspection; and findings reports of SAAP grants for potable water, wastewater, and infrastructure development programs for 5 sites in the San Francisco Bay Area. The procurement review and on-site evaluations ensure that a federally funded project, as constructed, complies with the original project objectives, scope, and detail and is in environmental compliance with all federal laws and statutes. Client: U.S. EPA Office of Wastewater Management [OWM].

*Site Investigation/Remediation*

- Multinational Manufacturing Corporation, Missouri (February 2019 – present): assistant project manager for groundwater remediation under RCRA Consent Order at a site impacted by volatile organic compounds and metals. Responsibilities include project management, engineering design, data evaluation, and reporting. Assisted with development of the draft environmental covenant and requested amendments to the Consent Order. Client: Confidential.
- Brownfields Soil Management, Baltimore, Maryland (February 2019-August 2019): Manages the process of identifying, characterizing and disposing of contaminated soil for a private client redeveloping two brownfields properties in Baltimore. Prepares reports on soil testing, determines the classification of soil, and completes soil and waste profiles. He also contracts soil transportation and disposal subcontractors and coordinates work by multiple parties on site. Client: Confidential.
- RCRA Investigations/Land-Use Control Plans, U.S. Army Garrison Fort Belvoir, Virginia (2008 -2014): assistant project manager and field team leader tasked with designing and implementing soil and groundwater site investigation and remediation strategies in accordance with the installation's RCRA Permit. Provided environmental data management, validation, geospatial data interpretations, and groundwater modeling utilizing GIS. Conducted field sampling, logistics, and contractor oversight during environmental investigations. Provided field oversight on over 40 Phase I Solid Waste Management Units (SWMUs) RCRA Facility Investigations (RFIs) over five years. Many of the SWMUs received regulatory acceptance of "no further action".

Successfully closed of over 110 SWMUs at Fort Belvoir through an Administrative Closure Report and an additional 40 SWMUs through a No Further Action Closure

**DAVID C. POSTLEWAITE**  
*Lead Environmental Scientist*

---

Report, which documented historical investigations from the 1980s to the 1990s that were closed by the Virginia Department of Environmental Quality (VADEQ) but were never officially received NFA from the US EPA and formally removed from the installation's RCRA Part B Permit. Created a decision document and LUCIP for 60 of these closed SWMUs.

Facilitated the majority of the geospatial analysis support through the use of GIS technologies, on-site GPS support, and database management, as well as the creation of accurate and professional figures for clients, briefings, and documents. Created interpretive tables from data received from laboratory investigations. Provided additional support to the project through statistical analysis and advanced interpretation of data collected. Produced documents and reports that provide accurate and realistic conclusions/recommendations from scientific interpretation and analysis of data from field investigation findings. Client: Client: U.S. Army Corps of Engineers [USACE], Baltimore District.

- Fort Belvoir North Area, Springfield, Virginia (2007-2014); project scientist/field team leader that supported the SWMU, UXO Range, and Tank Site Investigation and Remediation required to accommodate the \$2 billion 2005 BRAC recommendations for redevelopment of Fort Belvoir North Area for the construction of the new National Geospatial Intelligence Agency campus. Team prepared more than 50 site environmental investigation plans and facilitated EPA approval—all within a two-year period. Team supported the investigation and remediation effort by providing long-term monitoring plans, Decision Documents, and Land Use Implementation Control Plans for all eight of sites that still had detections of VOCs, SVOCs, and explosive compounds above regulatory screening levels. Aided in managing risk assessments at three sites to determine whether there were risks to ecological and human health, as well as whether further actions, such as active remediation systems, were warranted. Client: USACE, Baltimore District..

*Water Resources*

- Phase II MS4 Permit Compliance Support for the City of San Francisco and Treasure Island (2016–2019): project scientist and on- site liaison for the stormwater permitting group. Attends staff meetings and provides updates to relevant stakeholders and off-site personnel on the team. Conducts technical research on water quality issues, pollution prevention practices, and stormwater treatment technologies. Conducts geospatial interpretation/analysis and mapping of data with GIS desktop applications and remote sensing field technologies. Assisted SFPUC and the City of San Francisco's Legal Counsel with the drafting and implementation of MOUs between SFPUC and various agencies and departments across San Francisco (e.g., Rec and Park, Port of SF). Spearheaded the creation of a program to annually inspect over 300 MS4 outfalls across San Francisco and Treasure Island. Collected samples and analyzed data from outfalls to identify illicit discharges. Collected data for annual reporting, trash analyses, and the Program Effectiveness Assessment and Improvement Plan (PEAIP). Client: San Francisco Public Utilities Commission [SFPUC] and Treasure Island Development Authority [TIDA].
- SWPPP Compliance and Inspections Pipeline Construction Site, Brentwood, California (2016–2017): Project Scientist for SWPPP inspection for a major liquid petroleum gas pipeline construction project during the wet weather season. Inspected the on a weekly basis to determine if BMPs were properly installed and managing stormwater on the project site. Provided consultation and

**DAVID C. POSTLEWAITE**  
*Lead Environmental Scientist*

---

recommendation to the company on cost-effective approaches for improving stormwater compliance during the project. Client: Kinder Morgan.

- Sediment/Surface Water Data Collection, Aberdeen Proving Ground, Maryland (2012-2013): field team leader and supported the total maximum daily load (TMDL) modeling group by overseeing the monthly collection of water quality data, as well as surface water and sediment samples from various streams and rivers that connected to the adjoining Chesapeake Bay. Collected samples in heavily secured active military training ranges, usually after normal working hours or on weekends due to the use of live ordnance exercises. Led team of three environmental scientists in a small watercraft to collect 30 samples monthly across the military installation, which required extensive interaction with military personnel and presented logistical challenges due to the high level of security at each site. Oversaw field sampling, logistics, laboratory management, and the procurement of the field equipment. Client: US EPA Office of Water [OW].
- Florida Inland, Estuary, and Coastal Nutrient Water Quality Criteria Development Support (2012-2013): environmental scientist that supported the US EPA OST in developing numeric nutrient criteria rules in Florida in many phases including the initial determination, draft rule, public comment process and comment response, and implementation. Contributed to the preamble and technical support documents including figure production; estuary system descriptions; and marine lakes, tidal creeks, and south Florida flowing and marine waters analyses. Supported the estuary/coastal comment response effort. Client: US EPA Office of Science and Technology [OST] / Health and Ecological Criteria Division [HECD].
- EPA State and Tribal Grant Program, Nationwide (2008-2010): field auditor that ensured that federal grant agreements and funding allocated to each municipality for drinking water, stormwater, and wastewater projects were correctly used and properly apportioned for each construction project. Completed over 40 EPA engineering inspections and financial audits at multiple municipal wastewater and drinking water treatment facilities throughout the Southeastern and Midwestern United States. Drafted reports for each grant project that assessed the overall state of the project, as well as noting any financial inconsistencies or record keeping discrepancies and to determine the need for follow-up visits. Client: US EPA OW.
- EPA National Rivers and Streams Assessment, Nationwide (2008): field support for river and stream assessments conducted in Tennessee, New York, and New Jersey. Performed physical habitat surveys of each river/stream site, which included the numerous measurements of various ecological indicators, physical attributes, and habitat classification. Carried out physical habitat surveys on streams as small as half a meter wide to 350+ meters wide. Collected various biological samples including water samples, benthic macroinvertebrate, enterococci samples, sediment, and periphyton sampling. Assisted in processing and filtering samples before they were sent to laboratories for further analysis. Client: EPA OW.
- Pennsylvania Department of Environmental Protection TMDL Modeling and Support Services (2008): environmental scientist responsible for gathering substantial amounts of industrial and active coal mine outfall discharge data in support of creating watershed models for southwestern Pennsylvania. Researched and imputed outfall discharge data into large access database for modeling purposes. Client: EPA OW.

## DAVID C. POSTLEWAITE

### *Lead Environmental Scientist*

---

#### NEPA

- Integrated Natural Resource Management Plan (INRMP) for Lake City Army Ammunition Plant, Missouri (2013-2014): project scientist charged with drafting key sections of INRMP for Lake City Army Ammunition Plant including the geology, soils, groundwater, climate, floodplain, stormwater and hazardous waste sections. The INRMP had not been updated since 1998 and required a much research and coordination with the installation to properly update the information in INRMP. Client: US Army Materiel Command [AMC].
- Programmatic EA Building Removal and Demolition of Approximately 6,000 Buildings at 20 Army Installations, Nationwide (2013-2014): project scientist charged with drafting the hazardous, toxic, and radiological waste section of a NEPA programmatic environmental assessment (PEA) for AMC building demolition of over 6,000 structures and industrial facilities. Analysis was extremely complex due to the historical uses of the structures, including ammunition packing facilities, munitions storage bunkers and demilitarization plants. Hazards included paints/caulking containing PCBs, residual contamination from explosive and chemical warfare materiel, asbestos, lead-based paint, and impacts from nearby contaminated sites. Client: US AMC.
- BRAC Environmental Assessments for Walter Reed Army Medical Center (WRAMC) (2007-2008): project scientist responsible for providing geospatial data evaluation and graphic support for various reports and tasks pertaining to the WRAMC BRAC program. Drafted the geological section of the EA with the use of GIS tools. Gathered data to determine whether a Record of Environmental Consideration (REC) was appropriate. Client: USACE, Mobile District.
- Master Planning for U.S. Army Garrison Fort Belvoir, Virginia (2007-2008): environmental scientist responsible for creating EA reports for the specific areas affected by development/construction activities under the 2004 BRAC mandate for Fort Belvoir. Conducted risk analysis on the different development areas and recommended mitigation solutions to potential problems that could be encountered during stages of development by producing multiple area development plans for various areas of the post. Provided advanced geospatial analysis, data management, and graphics support to the Belvoir New Vision Planners (BNVP). Client: USACE, Baltimore District.

# Erik Gustafson PG, CHMM

PRINCIPAL ENVIRONMENTAL SCIENTIST

## Firm

Louis Berger

## Education

MS, Environmental and Waste Management

BS, Environmental Science

## Registrations/Certifications

Professional Geologist (NY)

Certified Hazardous Materials Manager

40 Hour HAZWOPER Health and Safety Training

8 Hour refresher for OSHA HAZWOPER (annual)

8 Hour OSHA Hazardous Waste Supervisor Training

8 Hour OSHA Confined Space Supervisor Training

8 Hour OSHA Excavation Safety for the Competent Person Training

American Red Cross First Aid/CPR Certifications

NAUI Open Water I SCUBA Certification

**Years of Experience** 21

**Years with Firm** 8

## Professional Summary

Mr. Gustafson has more than 21 years of experience in environmental investigation and remediation. He successfully developed and executed all phases of work from bid and proposals through project closeout. Responsibilities include managing and providing technical services on site characterization, remedial action assessment, remedial designs and work plans, soil and groundwater treatment (including in-situ), remedial performance evaluation and optimization, groundwater monitoring, and post-remedial closeout activities. Erik has successfully worked on projects managed at the federal level through the USEPA's CERCLA and RCRA programs, as well as numerous state and local programs.

## Selected Louis Berger Experience

**Bulova Corporation, Voluntary Cleanup Program Site, Jackson Heights, New York. Project manager and technical lead.** Project includes the completion a Remedial Investigation to assess the extent of chlorinated ethane impacts to soil, soil gas, groundwater, and vapor intrusion into on- and off-site buildings; completion of various treatability studies including an anaerobic biostimulation study, a bioaugmentation study, a chemical oxidation study, and a zero-valent iron study; completion of a biostimulation pilot study, preparation of a Remedial Action Work Plan, design and construction of a biostimulation injection/recirculation system. This bioremediation system includes 48 extraction wells, 33 injection wells, and the remediation system enclosure. In addition, to address a localized area of mobile DNAPL, a co-solvent flushing approach was developed and implemented. This co-solvent flushing approach involved obtaining multiple permits, installation of injection and extraction wells, construction of control manifolds with safety interlocks, and the injection of 15,000 gallons of 190-proof ethanol to solubilize the DNAPL for subsequent extraction. Additional activities have included excavation of surficial soils across the site, preparation of a Site Management Plan and Final Engineering Report. Work is being completed as part of a NYSDEC VCP Agreement.

**Kinder Morgan, RCRA Remediation Site, Staten Island, New York. Technical lead.** Project includes the completion of investigation and remediation of various petroleum types at a major oil storage facility. Project included the completion a RCRA Facility Investigation (RFI), Corrective Measure Study (CMS) including the completion of three (3) sodium persulfate pilot studies, and the preparation of a Corrective Measure Implementation (CMI) Work Plan to address six (6) hot spots. Remediation of these hot spots include designing and implementing one or more of the following: excavation, persulfate chemical oxidation, bioremediation, surfactant flushing and monitored natural attenuation. Work is being completed as part of a USEPA RCRA Administrative Order on Consent.

**United States Army Corps of Engineers, Kansas City District, Price Landfill, Pleasantville, New Jersey. Technical Lead.** Responsible for investigating and evaluating remedial options for a mixed petroleum and chlorinated VOC plume extending approximately two miles downgradient, up to 120 feet below grade, which was impacting a freshwater creek. Evaluated degradation pathways for each contaminant (benzene, chlorobenzene, bis(2-chloroethyl)ether, 1,4-dioxane), geochemical conditions across the length of the groundwater plume, and conducted a microbial population assessment using biomass estimates, metagenomics, and QuantArray® and Bio-Trap® studies.

**New York City Economic Development Corporation, Toxics Retainer Contract, Various Locations in New York City. Project manager.** Contract Manager for an on-call contract regarding hazardous waste, due diligence and industrial hygiene-related task orders. Projects completed included Phase I ESAs, Phase II ESIs, geotechnical surveys, mold and mildew surveys, asbestos surveys and abatement project monitoring, and noise monitoring surveys.

**United States Army Corps of Engineers, Kansas City District, Sylvania Corning FUSRAP Site, Off-Site Groundwater Characterization and Feasibility Study, Hicksville, New York. Field team leader.** Field Team Leader for the investigation of chlorinated-, uranium- and nickel-impacted soil and groundwater. Activities include preparation of work plans for on-site source investigation and off-site groundwater characterization, Field Team Lead overseeing the investigational activities, test pit excavations to locate drywells and other drainage structures, completion of compound-specific isotope analysis (CSIA) study to assist in allocating the off-site groundwater plume which has commingled with several other sources, preparation of a Remedial Investigation Report, and preparation of a Feasibility Study.

**New Jersey Department of Transportation, Vineland Maintenance Facility, Vineland, New Jersey. Technical lead** responsible for remedial design of petroleum-impacted soil and groundwater. Activities included evaluating geochemical conditions, and preparation of remedial design using an oxygen-releasing material (ORM) to stimulate the existing microbial population to aerobically degrade the petroleum contaminants.

**United States Army Corps of Engineers, Former Brookley Airforce Base, Mobile, Alabama. Technical lead.** Technical Lead for the remedial design of chlorinated-impacted soil and groundwater. Activities included preparation of remedial work plans to address the chlorinated impacts using a hydrogen-releasing compound (HRC) to stimulate the existing microbial population to anaerobically reduce the chlorinated contaminants.

**Bulova Corporation, Petroleum Remediation Site, Woodside, New York.** Project manager for the investigation and remediation of a petroleum-impacted site. Project included the completion a remedial investigation to assess the extent of petroleum impacts to soil and groundwater. Remediation of the site involved the shoring of a curved retaining wall for an elevated parking lot, excavation of soil impacts above the groundwater table, the application of oxygen-releasing material and chemical oxidant to address saturated-zone soil impacts and groundwater, respectively, site restoration and implementation of a quarterly groundwater monitoring program.

**United States Postal Service, Bioremediation Site, Groton, Connecticut. Technical lead.** Technical Lead for the investigation and remedial design for petroleum-impacted soil and groundwater. Activities included preparation

of work plans to investigate and define the source zone impacts, and remedial using oxygen-releasing material (ORM) to stimulate the indigenous microbial population to biologically degrade the petroleum contaminants.

**Bulova Corporation, Class 2 Inactive Hazardous Waste Site, Sag Harbor, New York. Project manager and technical lead.** Managed, design, construction and operation of an air sparge/soil vapor extraction system for the remediation of trichloroethylene-impacted soils and groundwater, and created and managed subsurface investigations including soil, groundwater, soil gas delineation and vapor intrusion into off-site buildings. Provided oversight of soil excavation within a confined area requiring guzzler extraction, shoring and air monitoring. Currently providing general consulting and cost estimating for site redevelopment activities under a Site Management Plan. Work is being completed as part of a NYSDEC Order on Consent.

**Cortese Landfill Project, Narrowsburg, New York.** Project manager for the completion of a persulfate treatability study. Activities included the development of a treatability study work plan for by the USEPA, collection of samples, and completion of persulfate bench scale testing.

**Various Projects for Major Insurance Carrier, Various Locations in U.S.** Provided technical review and cost estimating for various projects involving the use of hydrogen peroxide, permanganate, biostimulation, bioaugmentation, dual-phase extraction, groundwater pump and treat, AS/SVE and others.

**Riverside South/Penn Yards, Diesel Fuel Remediation Project, Manhattan, New York.** Project manager and environmental scientist for a dual-phase high vacuum extraction remediation project. Activities included subsurface investigations, tidal effect study to determine effects of Hudson River tide on diesel fuel thickness levels within monitoring wells, and recovery of diesel fuel via vacuum truck extractions. Coordination required between client, regulatory agency, local unions, and NYC Department of Parks and Recreation. Work was completed as part of a NYSDEC order on consent.

**Smithtown Cleaners, Dry Cleaner Remediation Project, Smithtown, NY. Project Manager** for a drywell excavation project with subsequent subsurface investigations and groundwater monitoring for tetrachloroethylene-impacted groundwater issue. Provided testimony as part of a civil suit against responsible party. Interacted with regulatory agencies and client's attorney and insurance provider.

**Hess Corporation, Various Retail Petroleum Sites, Long Island, New York.** Project manager for 32 retail petroleum sites on Long Island, New York. Tasks include remedial investigations, preparation of remedial action work plans, corresponding with NYSDEC and remedial action.

**New York City Transit Authority, Remediation Projects, Various Locations in New York City Boroughs.** Environmental scientist for the oversight of construction activities and management of operations and maintenance activities for several product recovery and groundwater treatment systems related to capital improvements to the UST program.

**KeySpan Corporation, PCB Investigations, Various Locations in Nassau and Suffolk Counties, New York.** Environmental scientist for the creation and implementation of work plans related to PCB investigations for surficial and subsurface soils.

**New York City Transit Authority, #7 IRT Extension Phase I Environmental Site Assessment, Manhattan, New York.** Environmental scientist for the completion of a Phase I ESA associated with the extension of the #7 subway line to the Westside of Manhattan. Area of assessment included the area between 28th Street and 42nd Street and 8th Avenue to 12th Avenue.

**Various Clients, Phase I and II Environmental Site Assessments, Various Locations in New York and New Jersey.** Project manager and/or environmental scientist for the completion of approximately 100 Phase I ESAs and

approximately 40 Phase II ESAs. These Phase II sites include former manufactured petroleum gas (MGP) sites, NYSDEC Class 2 Inactive Hazardous Waste sites, Voluntary Cleanup Program (VCP) sites, dry cleaning facilities and retail petroleum. Media investigated include indoor air, groundwater, soil, soil gas, sludge, and river sediment samples. Types of contaminations investigated include volatile and semi-volatile organic compounds, metals (dissolved and total), PCBs, pesticides, herbicides and ethylene glycol.

#### **Presentations**

- Laboratory and Field-Scale Biostimulation of Chlorinated Ethanes – Battelle 9<sup>th</sup> International In-Situ and On-Site Bioremediation Symposium, Baltimore, MD, May 2007
- Bioventing Case Study – Battelle 10<sup>th</sup> International In-Situ and On-Site Bioremediation Symposium, Baltimore, MD, May 2009
- Co-Solvent Flushing Case Study – Battelle 9<sup>th</sup> International Conference on Remediation of Chlorinated and Recalcitrant Compounds, Monterey, CA, May 2014
- Bioremediation System Exit Strategy – Society of American Military Engineers (SAME) 8<sup>th</sup> Symposium on Design and Construction Issues at Hazardous Waste Sites, Philadelphia, PA, April 2015
- Anaerobic Reductive Dechlorination of Chloroethane...It Does Happen! – Battelle 10<sup>th</sup> International Conference on Remediation of Chlorinated and Recalcitrant Compounds, Palm Springs, CA, May 2016
- The Synergy that Never Happened – Battelle 10<sup>th</sup> International Conference on Remediation of Chlorinated and Recalcitrant Compounds, Palm Springs, CA, May 2016
- Multi-Faceted Approach to Evaluate Discharge Locations at a FUSRAP Site – 2018 Waste Management Symposia, Phoenix, AZ, March 2018
- Lessons Learned During DNAPL Source Zone Remediation – Battelle 11<sup>th</sup> International Conference on Remediation of Chlorinated and Recalcitrant Compounds, Palm Springs, CA, April 2018
